

5 Compelling Reasons you should consider the **Qvera Interface Engine (QIE)** for your ConnectR/DataConnect Replacement

Driving down the cost of healthcare requires software designed specifically to support your complex needs without adding complexity to your job.

Reason 1: Proven Success & Expert Support

EHR Integration Services with QIE have a proven track record of successful ConnectR/DataConnect replacements and ongoing support by leading health systems across the country such as...

Reason 2: Seamless & Painless Conversion

Who better to support your conversion, but the same people who have been the ConnectR/DataConnect experts for years, [EHR Integration Services](#), and the company dedicated to making them successful?

- QIE Certified partner with years of experience
- Proven track record of successful conversions
- Convert individual interfaces to eliminate downtime

The **most effective support** for your long-term integration strategy

“In early 2015, we made the decision to migrate all of our interfaces from ConnectR to Qvera Interface Engine

(QIE). Working closely with EHR Integration Services, we migrated most of our ConnectR interfaces in 3-months, including the addition of 2 new clinical applications. We feel like we have control of our IT strategy again!”

John Grey, MHA IT Director, Murfreesboro Medical Group

Reason 3: The Only Solution with Native ‘Patient Not Found’ Functionality

In addition to a comprehensive list of supported functionality, QIE has improved the ‘patient not found’ error management workflow you have come to rely on in ConnectR. (Rhapsody and CCG **do not** support this functionality!)

- Qvera specifically created this enhancement in QIE to ensure no loss of functionality for ConnectR users
- Quickly and easily reconcile messages that can’t find the right patient
- See all the functionality that QIE supports

Reason 4: Lowest Total Cost of Ownership

QIE is the most cost-effective interface engine

- Unlike the competition who license both the source and destinations separately, QIE only charges for sources and allows unlimited destinations at no additional cost
- By simplifying interface development and making it much faster, QIE drives down the overall cost of your conversion
- Flexible licensing options make it easy to find the right fit for your organization
- QIE certification classes are offered at a fraction of the cost of the competition and includes the option of onsite training

Reason 5: Backed by the Industry Leader in Healthcare Interoperability

Because Qvera is actively involved in the industry’s drive towards interoperability standards and innovation, you never have to worry about falling behind.

- Qvera’s sole focus on a single product means QIE is constantly being enhanced, providing you with the most up-to-date functionality
- From helping develop the new HL7 FHIR protocol to certifications such as Concert by HIMSS, Qvera and QIE keep you informed and ready to tackle any interfacing challenge
- QIE is the only Interface Engine certified by Concert by HIMSS

ConnectR Replacement Comparison Summary	QIE	Competition
Native built-in 'Patient Not Found' functionality	✓	✗
No additional charge for destination connections	✓	✗
Development use of product prior to completing certification/training	✓	✗
Minimum retail cost for certification/training	\$1,995	~\$25,000
Onsite training option available	✓	✗
Maximum number of connections (sources and destinations) allowed	Unlimited	~50*

* There is a maximum number of connections, after which, customer must purchase license directly from the interface engine vendor, which is much more expensive
