**‘Perfect Practice’ Summit Designed to Inspire Workflow, Data Management
Advancements in Healthcare**

*EHR Integration Services to host three and one-half days of training, coaching and interactive dialogue for
healthcare professionals*

Skaneateles Falls, NY, October 2, 2013—[EHR Integration Services](#) (EHR IS), a leading healthcare data management service company that transforms complex data integration issues into clinical and operational workflow improvements, announced today that it is in the final pre-registration stage for healthcare clinical and IT professionals who want to attend the first ever [EHR ‘Perfect Practice’ Summit and Expo](#)—a hybrid program, combining integrated hands-on training modules and practical breakout sessions with inspiring special events and motivating keynote presentations.

“Physicians are dealing with an extraordinary amount of change in the industry,” said Craig Luce, president, EHR Integration Services. “Many are implementing EHR systems to qualify for meaningful use incentives, but are struggling to successfully integrate them with other ancillary information systems into their daily practice. Some are doing their current administrative tasks digitally, but are struggling to free up time to spend with their patients. Many physicians could find all of these changes daunting, but there are new IT tools available that can actually provide an opportunity for them to improve care. Our ‘Perfect Practice’ Summit will expose participants to content experts and discounted training that can help them streamline workflow, improve clinical processes and ultimately impact their organization’s bottom line.”

Taking place October 22 – 25 at the [Lodge at Welch Allyn](#), the event is designed to meet the most pressing electronic health record (EHR) and practice management training needs that healthcare professionals address daily while assisting their clients to: streamline front desk processes, improve clinical / practice management workflow, enhance back office productivity and leverage information technology. In addition to multiple breakout sessions led by some of the leading minds in data integration services, [three distinct training programs will be offered](#). Each program is delivered in a series of 1-2hr training modules thoughtfully scheduled throughout the conference. Attendees are eligible to pick and choose any number of the individual training modules that are of interest across all three programs, for one fixed price.

P. 2— October 2, 2013

Perfect Practice Summit Designed to Inspire Workflow, Data Management Advancements in Healthcare

Sean McLeod and Michael Muyot will serve as co-keynote speakers at the event. McLeod is an award winning Producer, Artistic Ambassador, and American Choreographer whose work spans more than 20 years and three continents. He is an acknowledged developer of movement systems, most notably his codified “MT” McLeodTechnique, MT Afro Hip Hop, Training For Athletes (TFA), and Reinforced Motor Function® (RMF) which are now being taught globally. McLeod is a Mediation Expert, Motivational Speaker and Program Developer who uses the arts to teach Life Skills, Family Development, and Personality Management for corporations and executives.

Muyot is an acknowledged leader in Sustainable Investing and has developed a unique set of tools that is helping to drive the industry. He designed the SmartView® 360 Platform, which powers sustainability indexes, rankings and research reports; including the NASDAQ® CRD Global Sustainability Index (QCRD), the Global 1000 Sustainable Performance Leaders on Justmeans and the Southeastern Corporate Sustainability Rankings.

The summit will also include a special ‘100 Thank Yous’ gala event, stress management lessons and planned networking discussions between attendees, consultants and valued partners. Event details and registration information can be found at <http://www.ehr-integration.com/news/ehrsummit2013/summithome.html>.

About EHR Integration Services

Founded in 2006 by President Craig Luce, EHR Integration Services (*EHR IS*) consists of a team of skilled specialists who leverage their knowledge and experience in Healthcare IT to transform complex data integration issues into clinical and operational workflow improvements required to manage today’s electronic medical practice. Headquartered in Skaneateles, New York, the *EHR IS* mission is to improve care delivery and bottom line results through “*Perfect Practice*”—the company’s proven consulting process and service philosophy that provides the perfect approach to data integration solutions. The company’s offerings include consulting, EHR extraction-conversion services, interface development and training, and productivity applications. *EHR IS* works closely with a few select industry leading EHR/PM vendors and is an Allscripts Certified Service Partner and GE Healthcare Professional Services Partner. For more information about the company visit www.ehr-integration.com.
