

EHR Integration Services Announces Strategic Alliance with EagleDream Health

The innovative analytics platform will integrate with EHR Integration Services' EHR QIS application to provide a unique and individualized population health view

Skaneateles, NY, October 27, 2015 — In a strategic move to continue to leverage complementary core competencies, skilled consulting resources and state-of-the-art technology solutions for the physician office market, the [Perfect Practice Alliance](#) (PPA) is welcoming Eagle Dream Health, Inc., as an affiliate partner.

EagleDream Health, a Rochester, New York-based healthcare analytics and population health management software company, delivers a SaaS-based, integrated solution that spans the entire clinical, financial and administrative spectrum. Its comprehensive analytics platform, which synchronizes and standardizes multiple data sources into a powerful database that provides information across the entire continuum of care, will integrate with the EHR Quality Information System (QIS) solution from [EHR Integration Services](#) (EHRis), a leading healthcare data management service company.

“Our integrated offering will go a long way in linking clinical outcomes with cost and claims data to create innovative, actionable insights for physician practices,” explained Craig Luce, President of EHR Integration Services, “We at EHRis are excited to see the PPA grow with valuable partners such as Eagle Dream Health.”

The EHR QIS solution provides physicians with immediate point-of-care feedback on patient quality measures and gaps in care. Utilizing both clinical and claims data, the EagleDream Health platform provides a population view of performance against metrics, condition registries and risk stratification. By uniting the two solutions, the PPA is creating a comprehensive, integrated population health management suite.

“We are delighted to be providing our capabilities through the Perfect Practice Alliance,” stated Dr. Betty Rabinowitz, President and CEO of EagleDream Health. “This powerful combination of resources will provide physician practices with the tools they need to improve quality of care while reducing unnecessary costs.” Dr. Rabinowitz, a founder of EagleDream Health, is a Clinical Professor of Medicine at the University of Rochester School of Medicine and most recently served as Medical Director of the university’s Center for Primary Care, where she oversaw clinical operations and population health management efforts for its employed primary care network.

The PPA was created by [EHR Integration Services](#), [National Physician Services](#) and [Byte Sized Solutions](#) with the mission of helping practices efficiently and cost-effectively achieve their desired clinical, technology and business goals. With an emphasis on workflow improvements and bottom-line results, the PPA offers a wide range of opportunities for physician groups to become the Perfect Practice.

About EagleDream Health, Inc.

EagleDream Health, Inc., is a healthcare software analytics solutions company that delivers a SaaS-based, comprehensive, integrated solution that spans the entire clinical, financial and administrative spectrum. With its sophisticated analytic tools for managing value based care, its modular, tailored software enables organizations to achieve more successful population health management through increased quality of care to patients, reduced costs and greater patient access and engagement.
